WORK EXPERIENCE

Graphersdesk

Front-End Developer

March - 2023 - November - 2024

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, and React.js.
- Built a full-stack E-Commerce site using Next.js.
- Utilized React.js to create dynamic and interactive user interfaces.
- Styled components with Tailwind CSS and Bootstrap for clean and responsive designs.
- Managed version control using Git and GitHub, and leveraged Azure for cloud-based services and deployments.
- Solved complex debugging issues and optimized performance across various browsers..
- Contributed to improving the overall user experience by focusing on problem-solving and responsive web design best practices.
- Worked on projects such as:
 - ✓ **HubNugGet** : Built using React.js, Material UI.
 - ✓ **The Task Tools** : Developed using Angular, Angular Material.
 - ✓ **Ecommerce** : Designed with Next.js, MongoDB, Material UI.

FREELANCE

WordPress Developer

November - 2022 - January - 2023

- Created responsive and visually appealing websites using the Elementor plugin, ensuring seamless user experiences and modern designs.

Graphersdesk

Front-End Developer Intern

December - 2022 - February - 2023

- Contributed to a project using the Angular stack, ensuring efficient and scalable development.
- Identified and resolved critical bugs, enhancing application stability and performance.

Technical Skills

Frontend Development: React.js, Next.js, Angular, JavaScript (ES6+), HTML5, CSS3, SASS, Tailwind CSS

Version Control & Collaboration: Git, GitHub

Cloud & DevOps: Microsoft Azure

Career Objective

Seeking a challenging role in web development to leverage my full-stack expertise in building user-friendly, scalable applications. Passionate about innovation and problem-solving, I aim to contribute to impactful projects in a collaborative, forward-thinking environment that values continuous learning and professional growth.

PROJECTS

HubNugGet

- Developed the application using React.js, ensuring a robust and efficient user interface.
- Integrated social login functionality with Google, Facebook, and GitHub authentication.
- Leveraged libraries such as CKEditor and tools for HTML-to-PDF conversion to implement key application features.
- Utilized custom hooks and Redux for effective state management and scalability.
- Designed and implemented a real-time chat box feature using WebSocket technology.

Ecommerce

- Developed the application using Next.js for server-side rendering and seamless user experience.
- Implemented authentication functionality using Auth0, ensuring secure user access.
- Managed the backend and designed RESTful APIs directly within the Next.js framework for efficient data handling.

The Task Tools

- Built **The Task Tools** application using Angular, delivering a modern and intuitive user experience.
- Developed authentication modules, including Login, Registration, Password Recovery, and more, with comprehensive API integration.
- Integrated Google Login and CAPTCHA validation to ensure robust security and streamlined access.

Thesis Creators

- Designed web pages using the Elementor plugin, ensuring visually appealing and responsive layouts.
- Added a WhatsApp chat button to enable seamless user communication.

YSquare Technology

- Managed the backend in WordPress, ensuring efficient content management and functionality.
- Utilized GraphQL for optimized API calls and seamless data retrieval.
- Developed custom post types and fields to tailor the application to specific requirements.
